# Engage employees with award-winning cyber security eLearning

Getting your people to participate in cyber security training programs doesn't have to be a challenge. Our cyber security eLearning makes it easier to engage employees and set your Security Awareness Training program up for success.

Our award-winning cyber security eLearning is designed to capture the attention of your employees and drive real behaviour change. Our passion for developing engaging information security education can be experienced in the quality of our content.

Our Elements library is not only informative but also captivating, making it an enjoyable and memorable learning experience for your users. Curate tailored and targeted cyber security training courses that are specific to your organisation's needs and create a frontline defence against cybercriminals.

Engage, educate and empower end users to be your frontline defence

World-class content

Educate and engage employees with award-winning training from our eLearning library, expertly produced in-house with personality in mind. Explore live-action content and animation using the latest graphical and 2D animation techniques.

Customised courses

Create your own cyber security or compliance eLearning courses using a variety of formats including videos, PDF files, quizzes, policies and learning interactions.

Bite-sized learning

Explore our extensive range of animated or live-action content and deliver digestible bites of cyber security training to your employees in less than 5 minutes.

Upload your own content

Supplement MetaCompliance's curated courses with your organisation's own custom training and personalised intros. Simply upload your own training content to create your own Fusion courses.

Knowledge checks

Use the skills-based assessments to monitor and measure your end users' security knowledge. Identify high risk users, areas of improvement and track progress with our detailed reporting.

Automated awareness training

Save time and engage employees with cyber security training, all year round.Schedule your eLearning in advance and implement an effective cyber awareness program with minimal effort.

Branded content

Incorporate your branding into our eLearning content by adding your logo to Nano introductions. Create familiarity with content employees recognise and respect with corporate branding.

Policy management

Easily obtain employee attestation and present users with organisational policies directly within a course. Increase policy participation and ensure your organisational compliance obligations have been met.

Microsoft Teams integration

Increase engagement levels and enable users to complete Security Awareness Training and policies without leaving the familiarity of the Microsoft Teams platform.

What our customers say

The absolute best in class.The product completely stands out from the competition on the market. Not only is the content informative, it is engaging, fun and steers clear from overwhelming users.

Julie W, ICT Operations Manager

I love the fun, interactive modules. The platform gives you the ability to make security training fun, informative, and relevant. It is an excellent, intuitive platform.

Kathryn R, Compliance Administrator

The content is excellent, and the users like it very much due to its duration. I can create annual campaigns for different targets and easily track their progress. On top of that, I can make my content and publish it.

Patricio I, Head of IT

Enhance engagement with eLearning employees will love

Take the first step to transform your cyber security training and deliver an engaging eLearning experience for your employees.
